

Wild Mammals and the Human Food Chain

The Mammal Society's Autumn Symposium 2005
held in association with the **British Society of Animal Science**
Friday 25 and Saturday 26 November 2005, London Zoo

The symposium will examine the interactions of mammals with the process of human food production. There are four themes:

- Interactions of wild mammals with crops, livestock and fisheries
- Infectious disease in livestock, wild mammals and humans
- Landscape and ecosystem processes
- Agricultural policy, human behaviour and biodiversity

Keynote speakers include:

Professor William Sutherland – *The future of the countryside*

Professor Jules Pretty – *Sustainable agricultural systems, rural economies and biodiversity*

Professor Mike Begon – *Infectious disease at the wildlife/livestock interface*

Professor Dirk Pfeiffer – *Monitoring and predicting wildlife/livestock disease risk*

Professor Luigi Boitani – *Large carnivores and livestock predation in Europe*

Professor Henry Buller – *Food production, rural economies and biodiversity*

Professor Philip Lowe – *Future directions*

Registration costs £70 for members of The Mammal Society or £90 for non-members.
